## SOFTWARE ENGINEER | QUALITY ENGINEERING | UNITY & XR

Fort Lauderdale, FL | maxleone0817@gmail.com | linkedin.com/in/max-leone-0a72b7b1

### PROFESSIONAL SUMMARY

Software engineer and test engineering leader with 10+ years of experience across XR platforms, developer-facing SDKs, and Unity and Unreal Engine integrations. My main disciplines are quality engineering, prototype engineering, and game development. My most recent professional work has focused on test infrastructure for Android XR. My deepest experience provides a solid foundation in XR SDK development, specifically Game Engine Integrations with native XR APIs such as OpenXR.

### HIGH LEVEL ENGINEERING GOAL

I hope to utilize my professional background in quality and my foundation in computer science/software engineering to build things that delight end users. Software quality is not dependent on one specific implementation or design strategy. What matters most is the people who make it and how much they care. Whether I am collaborating with humans or AI, I focus on creating an enjoyable experience for both my end users and my co-workers.

### TECHNICAL SKILLS & TOOLS

**Languages:** C#, Python, C/C++

**Game Engines:** Unity, Unreal, Godot

**Developer Tools:** Visual Studio, VS Code, Android Studio, Magic Leap App Simulator, Android XR Emulator

**Test Automation:** Pytest, Mobly, familiarity with Playwright

**Platforms, Runtimes, & SDKs:** Android XR, OpenXR, Lumin OS, Lumin Runtime, Magic Leap Unity SDK, Magic Leap Unreal SDK

**AI Tools:** Codex/GPT, Internal Gemini Models/Tools, Unity AI Tools

### PROFESSIONAL EXPERIENCE

#### MAGIC LEAP

##### Senior Software Engineer - Android XR Platform Testing - on assignment at Google

Feb 2025 - Present

Magic Leap | Remote

*Official title: Principal Software Engineer*

- Extended an internal Python/Mobly framework for running Android XR tests against XR emulators on macOS and Linux, implementing artifact fetching, emulator lifecycle, AVD setup, and results collection.
- Configured GCL-based CI tests for Android XR emulator and system-image validation across branches and build targets.
- Used internal LLM tools (internal Gemini models) to triage Android XR CI failures by analyzing bugreports and stack traces, identifying known issues, and drafting new bugs.
- Documented prompt patterns and guardrails for consistent AI-assisted triage while reducing unnecessary compute.

May 2024 - Feb 2025

##### Software Test Engineering Team Lead - Unity SDK

Magic Leap | Remote

*Official title: Staff Software Engineer*

- Led architecture and implementation of Unity test applications for SDK validation, including recording and serialization of user input and platform data.
- Designed and implemented XR user interfaces for Unity test applications.
- Owned release validation for new Unity and Unreal SDK features and regression coverage.
- Refined Unity SDK integration layer requirements based on OpenXR specifications.

Apr 2021 - May 2024

##### Senior Software Test Engineer - Unity SDK

Magic Leap

*Official title: Senior Software Engineer*

- Profiled CPU/GPU performance in production and test XR applications using the Unity Profiler.
- Developed Unity shaders in ShaderLab and HLSL to evaluate rendering quality and performance on Magic Leap hardware.
- Investigated rendering, shader, material, and compatibility issues across Unity's Built-in Render Pipeline, URP, and HDRP.

## MAGIC LEAP (continued)

### Software Test Engineer - Unity SDK

Apr 2019 - Apr 2021

Magic Leap | Florida

*Official title: Software Test Engineer*

- Validated new Unity and Unreal Engine SDK features on Magic Leap hardware.
- Developed and maintained Unity and Unreal test applications for validating new SDK features on Magic Leap hardware.
- Created and maintained manual test coverage for new features and regression across Unity SDK releases.

### Software QA Engineer - SDK Testing - Contractor

Jul 2017 - Apr 2019

Magic Leap | Miami/Fort Lauderdale Area

*Official title: QA Engineer*

- Maintained regression test suites and test plans for Unity, Unreal Engine, and native C SDKs.
- Executed manual SDK validation on early Magic Leap hardware.
- Built Unity test applications to explore and validate emerging XR SDK features.

### Independent Game Developer / Game Designer

Jan 2015 - Jul 2017

Knight Shift Games | Miami/Fort Lauderdale Area

- Founding member and early collaborator on Elsie, contributing to early prototypes, game systems, tools, vertical slices, and demos in Unity.
- Designed reusable game systems and custom Unity editor tools for content and game-design workflows.
- Worked across gameplay programming, technical design, prototyping, debugging, and art/sound integration; not involved in later production or final shipped builds.

### Traffic Simulations - Senior Capstone Project

Jan 2017 - Apr 2017

Florida International University | Miami, FL

- Built Unity simulations and visualization tools for evaluating autonomous-vehicle routing algorithms.
- Integrated a high-performance C/Python routing API with Unity and processed GeoJSON data for simulation and visualization.

### Junior Software Engineer / QA Engineer

Aug 2013 - Aug 2014

SDSol Technologies | Miami/Fort Lauderdale Area

- Designed and executed software test plans for custom, enterprise, and mobile applications.
- Coordinated defect investigation with QA engineers, developers, and product owners.

## EDUCATION

Florida International University - Bachelor of Science in Computer Science, 2016
